

# ergotron®

*moving you forward*

## **Committed to Professional-Grade Quality**

Unmatched quality and safety, combined with human-centered designs and ergonomics, make Ergotron products professional grade.

## **Certified Best Practices**

Ergotron takes customer safety seriously. That's why we go further to achieve complete certification for many of our facilities and products.

- Eagan, Amersfoort, and China facilities ISO 9001:2015 certification demonstrating our commitment to best-practice procedures in our facilities.
- China and Eagan facilities ISO 13485:2016 certification pointing to a robust quality management system overseeing our healthcare product manufacturing.
- Our StyleView® and CareFit™ Pro powered carts, plus LiFeKinnex™ Power System, are fully certified to UL/EN/IEC 60601-1 and CAN/CSA C22.2 No.601.1 M90 standards that regulate medical electrical equipment.

This means the power system and the entire cart are certified by a Nationally Recognized Testing Laboratory (NRTL), reducing the risk of electromagnetic interference and controlling leakage current to safe National Fire Protection Association levels.

## **Rigorous Safety Testing**

Ergotron's products undergo extensive testing that exceeds the industry's most rigid quality expectations. This ensures we deliver long-lasting, safe products that provide peace of mind.

- Our non-powered healthcare carts are designed and tested to applicable UL/EN/IEC specifications for enhanced patient safety.
- We perform 100% functional testing on every product.
- Cycle testing on a sample basis ensures product quality and reliability.
- 4-times load testing guarantees product safety for the rigors of commercial use.

*Look for the label! Certified products display a label as proof of certification. Ergotron's StyleView and CareFit Pro powered carts proudly display this label, which indicates certification for the entire cart!*
